Mountain Weather Forecast

Lake District National Park

Forecast valid from 00:00 on Saturday 19 Nov 2022 until 23:59 on Sunday 20 Nov 2022

Forecast Issued on Friday 18 Nov 2022 at 13:08

Confidence: High confidence for further unsettled weather moving in from the Atlantic with wet and windy periods expected throughout the forecast period. Also a good signal for colder weather later in the weekend with wintery conditions at times on the higher fell tops. Less confidence in timings of rainfall and amounts.

Headline for Saturday 19 Nov 2022: Early mist clearing, a bright day with sunny intervals and light winds.

Forecast for Saturday 19 Nov 2022

Weather: Cloudy overnight with mist and fog patches developing around the fells. By daybreak mist and fog will begin to clear but may linger around the eastern fells for much of the morning, otherwise becoming bright with some sunshine for the middle of the day. Tending to cloud over with mist and lowering cloud making for a dull evening with some rain towards midnight.

Chance of cloud-free hill tops above 800m: 40% improving to 90%, early low cloud will lift and clear, patches remaining on eastern fells.

Low cloud and visibility: Early scattered low cloud will lift and break leaving just patches mainly around eastern fells. Low cloud will tend to reform later in the afternoon and lower over the fell tops. Early mist will give moderate visibility but this will improve with very good visibility through much of the day, falling moderate again later in the afternoon.

Meteorologist's View

Fresh northwesterly winds will ease and turn southeasterly later in the day becoming quite strong during Saturday evening. Feeling quite cold on the fell tops particularly in the evening.

Forecast for Sunday 20 Nov 2022

Weather: Overnight rain will clear early in the morning but turning into a showery morning but a few brighter spells outwith showers. Showers may turn wintry above 700m with some sleet and snow on the highest tops.

Maximum wind: West or southwesterly winds.15-20 mph with gusts 25mph in the morning.

Chance of cloud-free hill tops above 800m: 20% at daybreak, improving to 60%, scattered low cloud associated with showers.

Low cloud and visibility: Early cloud around the tops will lift and clear but low cloud will form again around heavier or wintery showers during the day with layers above 600m. Visibility will turn poor for a time in wintery showers.

Temperature: **Valleys:** Plus 2 rising to 8 Celsius.
At 800m: Plus 1 Celsius.
Freezing level: 900-1000m.
